

## Early Journal Content on JSTOR, Free to Anyone in the World

This article is one of nearly 500,000 scholarly works digitized and made freely available to everyone in the world by JSTOR.

Known as the Early Journal Content, this set of works include research articles, news, letters, and other writings published in more than 200 of the oldest leading academic journals. The works date from the mid-seventeenth to the early twentieth centuries.

We encourage people to read and share the Early Journal Content openly and to tell others that this resource exists. People may post this content online or redistribute in any way for non-commercial purposes.

Read more about Early Journal Content at <http://about.jstor.org/participate-jstor/individuals/early-journal-content>.

JSTOR is a digital library of academic journals, books, and primary source objects. JSTOR helps people discover, use, and build upon a wide range of content through a powerful research and teaching platform, and preserves this content for future generations. JSTOR is part of ITHAKA, a not-for-profit organization that also includes Ithaka S+R and Portico. For more information about JSTOR, please contact [support@jstor.org](mailto:support@jstor.org).

## FOREIGN.

[Reports received from United States consuls through the Department of State and from other sources.]

*Cholera, yellow fever, plague, and smallpox as reported to the Supervising Surgeon-General United States Marine-Hospital Service, January 1 to October 28, 1898.*

[Report on recent constructions at the quarantine station of Camaran in the Red Sea—  
Translation in this Bureau from official report.]

The committee on construction at the lazaretto at Camaran reported the result of its labors on March 17, 1898, and later presented a supplementary report at the session of the council held August 20, 1898. The basis of the report was a statement drawn up by Engineer Roulet under direction of Dr. Stiepovich, secretary of the superior council of health, detailed for service at Camaran. This statement covered the work executed at Camaran up to May 25 of the current year. The work comprised: Six hospitals; 12 houses for persons of rank; 1 building for machinery, with 1 annex and accommodations for engineers, apparatus for distilling sea water, ice plant, steam saw, repairing shop, etc.; 1 building for the accommodation of the personnel, officers, pharmacy, and for storage; 5 small houses for lodgings for guards; 1 water tower with ice house in its lower portion; 1 building to accommodate the steam plant, brick, tiles, plaster mill, and large storeroom; 8,000 meters (about) of railway laid; 2 cisterns cut in the rock and reservoirs with a capacity of more than 4,000 tons; 2 conduits of fresh water which supply the cisterns; 1 conduit for supplying fresh water to vessels at the Mervani jetty; 1 conduit supplied from the wells on the main road, with cisterns and filters at the wells; 47 pavilions for latrines, with 24 sinks and 94 basins; 1 steam brick and tile plant with drying spaces; 1 plaster workshop with crusher; inclosed spaces for storage; lodgings for workmen.

The lazaretto of Camaran is arranged to receive 4,000 pilgrims at one time, but the present buildings and those which it is proposed to erect will accommodate 6,000. The following is a brief description of the work completed and in place:

(1) A large structure which accommodates the inspector and physicians and contains offices, a pharmacy, and a storeroom for supplies. It is a brick building on a stone foundation. On the ground floor are the offices, pharmacy, and supply department. Above, on the first floor, are the apartments of the inspector and the eight physicians, and the bathrooms. The building is surrounded by a veranda, forming a cir-
